EMILIE AUTUMN
Laced / Unlaced Trisol **2CD + Book 35,00€**
 "Just barely a breath after the worldwide success of ""Opheliac"", Emilie Autumn emerges yet again from her studio she calls ""The asylum"" with her latest work, ""Laced/Unlaced"", a double disc set featuring, no, not her voice, but her violin skills. Disc 1, ""Laced, "" represents her past, containing the worldwide release of Emilie Autumn's rare teenage classical violin recordings including works by Corelli, Bach, and Emilie Autumn's originals, all performed on period instruments with lute, harpsichord, and baroque cello accompaniment. Disc 2, ""Unlaced, "" represents her future, in an electric-violin, Yngwie-meets-Paganini-styled romp. Written in the ""victorianindustrial"", harpsichord-laden gothic style of ""Opheliac"" but with a metal edge, ""Laced/Unlaced"" shows the evolution from child prodigy classical violinist to reigning queen of metal shred violin, and beckons us ever deeper into Emilie Autumn's strange world with a flick of her black-nail-polished flying fingers. This strictly limited edition comes in an oversized hardcover double CD book filled with never-before-seen photos, Emilie Autumn's hand-written scores from the album, and personal notes. As beautiful to look at as to listen to, this ""behind the scenes"" look into the world of Emilie Autumn and her music makes it a collector's ""must have"". Order fast. Limited to 2000 copies world wide only"

LEATHER STRIP
The giant minutes to the dawn Alfa Matrix **2CD+DVD 35,00€**
 The album is also released as a limited carton edition with a bonus full length album with only new tracks and Leaether Strip's first ever DVD, confirming that Claus Larsen is definitely a multi-talented and complete artist. The Danish Master has personally created all the videos and paintings featured on the album's artwork

The giant minutes to the dawn Alfa Matrix **CD 15,00€**
 With a busy and successful year 2006 behind him, Claus Larsen rips right into the new year with his new explosive full length album "The Giant Minutes To The Dawn". 14 new tracks to depict a desolated landscape where darkness has settled in, leaving these scorched days and nights to the desperate creeping animals struggling for survival. The hourglass of humanity has finally reached its last grains of sand. It's through such a post-apocalyptic kaleidoscope that Leaether Strip describes and openly criticizes our dirty little human world. Much darker and harder than its predecessor album, this new opus offers full frontal anger bursts with "Blah Blah Blah", "Kill The Predator", the EBM killer "Commotio" or yet the perverted club hit "Dirty Little Secret". Claus Larsen's new storm of elektro assaults and harsh vocals do not stop there. Dense tracks like the anthemic, "Will The Sun Return?", "Crucify Them", "Caught In The Headlines" or the masterpiece "The Trouble" all fire off a rich palette of bombastic synth layers and carrying orchestrations bringing the album to its crescendo. Armed with his characteristic ripping bass lines, straight EBM beats, strong dark choruses, distorted vocals and upbeat catchy sequences, it looks like with "The Giant Minutes To The Dawn", Leaether Strip is launching a lightning devastation attack on the dancefloors of the universe. One final assault before the hourglass of human existence runs empty. Although it takes a turn for a more moody and personal break with "Annie" and "Seconds Last Forever", this new album can surely be qualified as Claus Larsen's hardest and darkest album ever. It is as if he had been catalyzing, distilling and regurgitating all the pains from our sedated world of neglect and has finally Damned You

RAZOR DOG Lucy fairy's club For 17 years, Chris Menta started as a session lead guitar player for many bands or personalities... Gothic, Rock, Classical, Celtic, Blues, Heavy-metal, Black Metal...One of his best experiences is to have worked with Rozz Williams and he still goes on working with bands in session who need a guitar player, and produces bands, like for example Amandine Ferrari (ex-Seventh Harmonic) for her last album. In the years 96/97, he started with a guitar and a lil amp, an old drum machine, a cheap mic, a multi track tape recorder, and so many ideas and feelings to record... a burning desire and the dream to be able to record all he had in mind. Today, the first solo work of Christ Menta is the RAZORDOG, mixing ambient with metal, deathrock with industrial, rock'n'roll with experimental... The album "Lucy fairy's club" contains 10 very dark tracks like "H.T3.S" that includes some devilish atmospheres, "Razordog" which is a real pleasure for fans or real american gothic-deathrock, or "Vindicative" and "Niaguido" that remind you the masters Skinny Puppy... REIN[FORCED] Futile longings Expect a very original and fresh blend of dark/harsh electro-industrial and EBM, d'n'b flavorings in the rhythms, and a dual vocal attack of harsh intensity! They totally pick up where Forced left off a few years ago. Perfect music for the club floors and very anthemic and catchy tracks also which tell it like it is! Lyrics with a venomous bite! Another aggressive industrial assault from DSBP! They have some wicked arrangements which show lots of experience and fine programming which is nice to hear these days...
